

Resolving security vulnerabilities (ICU vulnerable component) in APDFL

To resolve security issues related to the International Components for Unicode (ICU) you must install Adobe PDF Library 18. APDFL 18 uses version 68.2.

Navigate to the path below after you install the latest release of APDFL 18 to display a list of the Open Source software products provided with the Library software, and the versions of these products:

`\APDFL18.0.3\Documentation\CPlusPlus\APDFL18.0.3_OpenSourceSoftware.txt`
